

TPA3110 Mono Channel Digital Amplifier Board 30W Power Amplifier Module

TPA3110 Mono Channel Digital Amplifier Board 30W Power Amplifier Module is useful in applications like DIY Bluetooth speaker, home and car audio system modification.

Specifications and Features :

1. Amplifier Chip: TPA3110.
2. Working Voltage: DC 8-26V.
3. Output Power: 1 x 30W.
4. Applicable Speaker Impedance: 4/6/8 ohm(8 ohms Best).
5. PCB Board Size: 44 x 30 x 10 (LxWxH)mm / 1.65 x 1.18in.
6. Weight: 10 gm / 0.35oz.
7. DC 8-26V TPA3110 PBTL Mono Digital Amplifier Board AMP Module 1x30W for Arduino.
8. Single-channel digital power amplifier Board PBTL.
9. Mono digital audio power amplifier chip.
10. 30W output and low power consumption.
11. Sound quality is very good by using this module.
12. Applicable speaker impedance: 4/6/8 ohm(8 ohm is the best).
13. Application: DIY Bluetooth speaker, home and car audio system modification.
