LA7831

Monolithic Linear IC

COLOR TV VERTICAL DEFLECTION OUTPUT CIRCUIT

The LA7831 is a monolithic linear IC designed for large-aperture color TV vertical deflection output and has such features as greatly reduced number of external parts and low power dissipation. The LA7831 can be used in conjunction with the LA7620 series for video chroma deflection use and the LA7800 series for deflection use and the LA7850 series for display use to form a stable and compact vertical output deflection circuit.
